Summary

Web developer with experience using JavaScript, React.js, HTML, CSS. Experience working with customers to help develop project vision. Self-taught proficiency with computer troubleshooting. Excellent leadership, communication, and interpersonal skills.

Skills and Abilities

Coding: JavaScript ES6, React.js, TypeScript, REST APIs, Bootstrap/React-Bootstrap, npm, Redux, jQuery, HTML, CSS/SASS, Salesforce. Currently learning Java and Vue.

Software and Hardware: Experience with both OSX and Windows. Have used Git and GitHub for professional, educational, and personal projects. Accustomed to VS Code with some exposure to Eclipse and Atom.

Work Experience

Emory University | Software Engineer | July 2019 -

- Specializing in React.js development for the Office of Information Technology. Planning and developing web applications for internal and external users. Working in teams of 2-3, which allows me to practice my UI/UX skills and work closely with customers. Filled in as a Salesforce Administrator as needed from March to June 2020.

Projects

ReMedy

- Morningside Center site for compiling and presenting oncological alternative uses for common medical treatments.
- React frontend, Salesforce backend

VA Memorandum of Understanding

- Veterans Affairs application that keeps track of project hours to report to the federal government for funding.
- React frontend, Salesforce backend

Clinical Trial Administrative Service

- Keeps track of the various stages of clinical trials for the School of Medicine.
- React frontend, Salesforce backend

Beckett Letters

- English department application for browsing the metadata of author Samuel Beckett's personal correspondences.
- React frontend, Ruby on Rails backend

Education

Georgia Tech | Web Development Boot Camp | Spring 2019 | Atlanta, GA

- Intensive twelve-week program dedicated to designing and building web applications

Rhodes College | Fall 2014 - Spring 2018 | Memphis, TN

- Bachelor of Arts; Major in History, Minor in Religious Studies
